Chapter 6 Sensation and Perception
Sensation vs. Perception
Sensation Process of detecting physical energy (stimulus) from the environment and converting it to neural signals
Perception Process of selecting, organizing, and interpreting our sensations
Bottom-Up Processing Analysis that begins with the sensory receptors and works up to the brain's integration of sensory information
Top-Down Processing Information process guided by higher level mental processes, as when we ...

Perception the process of organizing and interpreting sensory information, enabling us to recognize meaningful objects and events. (Myers Psychology 9e p. 231)

Chapter 6: Sensation and Perception Flashcards | Quizlet

Perception involves both bottom-up and top-down processing. Bottom-up processing refers to the fact that perceptions are built from sensory input. On the other hand, how we interpret those sensations is influenced by our available knowledge, our experiences, and our thoughts. This is called top-down processing.
