### Objective Quiz | MCQ Multiple Choice Questions and Answers

Objective questions are, as the name suggests, question with an objective answer. An objective answer is an answer that stays the same no matter how many times the question is being asked. Example: What is the chemical formula for water? The answer is H2O, nothing else. A subjective question is a question that can be provided many different answers.

### What are objective questions? What are some examples? - Quora

An objective question usually has only one potential correct answer (although there may be some room for answers that are close), and they leave no room for opinion. Objective test questions differ from subjective test questions, which have more than one potential correct answer and sometimes have room for a justified opinion. Objective test questions may be constructed as a list of possible answers, requiring the students to recognize the correct one from the list.
