I bought this clock to replace an older Oregon Scientific model DP200A projection clock which has steadily gone downhill with failing segments and erratic time acquisition. As the other reviews reflect, Oregon Scientific doesn't make heirloom clocks, and is definitely a quality control "challenged" company.

Oregon Scientific Store - Projection Clocks

Most Oregon Scientific Clocks have a feature to turn on or force the clock to search for the RCC signal. The standard process to force the clock to search for the RCC signal is to press and hold the "up" or "+" button for 2 - 3 seconds. An indication that the atomic clock signal is enabled and searching for the signal is the Oregon Scientific signal icon which looks like a partial "O" will flash.

It doesn't dim enough with its auto dimming feature. Also the focus / optics were a little off and can't fully focus the projected image. I have it focused as best as it will offer, but my older Oregon Scientific is much much clearer and dims enough to let me sleep. Also the atomic clock feature has a weird time zone setting.
